### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3728

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Dempsey (506,103). Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams et al. (4,557,389). Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ramsey et al. (6,168,018). Each discloses a tool holder comprising a holding portion (31; 18; top of 14; respectively) used to hold a tool and a specification marking member formed of a retaining portion (19; 40; 86) and a marking portion (22; received label or other indicia; 89).

As to claim 2, each discloses a first locating element (21; surface of 40; 88) and a second locating element (surface of 22; back of label; label adhesive).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art of Figures 1-3 in view of one of Wobber (1,560,009) and Arblaster (3,397,434).

The prior art of Figures 1-3 discloses a tool holder comprising a holding portion (1) used to hold a tool and a specification marking member (2) formed of a retaining portion and a marking portion. Wobber and Arblaster each disclose a marking portion (11; 14; respectively) removably located in a retaining portion (3; 12). To modify the tool holder of the prior art employing a removable marking portion would have been obvious in order to provide interchangeable marking portions for the same holding and retaining portions, as taught by either one of Wobber and Arblaster.

As to claims 2 and 4, Wobber and Arblaster each disclose a first locating element (groove at edge 9 or 10; 23) and the marking portion having a second locating element (edge of 3 engaging the groove; 22).

As to claim 3, to reverse the location of the parts of Arblaster would have been an obvious reversal of parts, long held to be an obvious manner of altering an existing structure.

8. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over the prior art of Figures 1-3 in view of Feldman et al. (1,840,193). The prior art of Figures 1-3 discloses a tool holder comprising a holding portion (1) used to hold a tool and a specification marking member (2) formed of a retaining portion and a marking portion. Feldman et al. discloses a retaining portion including a first locating element comprising a projection (11) engaged with a second locating element, a groove (13). To modify the elements of the prior art employing the teaching of Feldman et al. would have been an

Art Unit: 3728

obvious substitution of engaging means already recognized in the marking portion field, as taught by Feldman et al..

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are tool holders with indicia.
